Dear Sir or Madam,

My name is James Goodman and I am writing to express my interest in the role of "Game Programmer" that you have listed on your industry jobs page for TT Odyssey Studios in Brighton.

I am a keen gamer and driven software developer who is currently working at *Costain Group PLC* as a *Unity VR Developer* producing immersive VR solutions for staff training. I have a 2:1 BSc degree in *Computer Science with Games Development* from the University of Sussex and enjoy the challenge of engaging with new projects, and learning new techniques and languages that I can use to further improve my programming abilities.

In my spare time I like to create Unity games, such as designing and releasing a word based Unity mobile game called "Letter Chain" which I have montitized and published to the Google Play Store. I also enjoy 3D modeling for use in both personal and 3D printing projects, which has helped me to better understand the design and artistic workflows of my colleagues. I am currently looking to follow my passion and move to a more games focused company.

I have attached a copy of my resume that details my technical and educational background, including projects undertaken both inside and outside of my current role at Costain, as well as a breakdown of the programming languages and tools with which I am familiar.

Thank you for your time and consideration. I look forward to hearing from you about this opportunity.

Kind Regards,

James Goodman
