

James Alexander Goodman

For the role of: Unity Game Developer

Location: Brighton | Phone: 07985 494587 | E-mail: jagoodmail@gmail.com | Portfolio: <https://jgoodhub.github.io>

Dear Sir or Madam,

My name is James Goodman and the purpose of this e-mail is to express my interest in the role of "*Unity Game Developer*" that you have listed on your games industry jobs page.

I am an enthusiastic and driven graduate programmer with a 2:1 Bachelor's degree in "*Computer Science with Games Development*" from the University of Sussex. I enjoy the challenge of engaging with new projects and learning new languages and techniques that I can use to further improve my programming abilities.

Across both my degree dissertation and personal projects undertaken in my own time I have developed my skills in both the Unity3D Engine and C# to an excellent level of understanding that I believe would be beneficial to the graduate role you have listed.

Across all years of my course I have been a key member of several team-based projects. In my 3rd year of study I was involved in a project that required our group to develop a prototype "recipe sharing" mobile application. For this we took an agile approach, starting with an iterative design process to create a minimum viable product and then building any future updates off feedback gleaned from user testing. This resulted in a widely successful assignment, receiving a grade of 79%.

I have attached a copy of my resume that details my technical and educational background, including projects undertaken both inside and outside of my degree as well as a breakdown of the languages and tools with which I am familiar.

Thank you for your time and consideration. I look forward to hearing from you about this opportunity.

Yours faithfully,

James Goodman

Virtual Reality is a quickly developing technology with a near endless set of uses and possibilities. I believe that solutions for many problems faced today may be found in this technology and I would therefore appreciate the opportunity to apply my skills learnt across my degree to achieving this goal.
